Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's response of 1/23/07 has been considered with the following results.

Claims 1-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/23/07.

Information Disclosure Statement

The IDS filed on 2/23/04 has been reviewed and made of record.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

Claims 15-17 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims do not add any further apparatus limitations to the parent claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 2627

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

1. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Ovshinsky et al further considered with Gibson ('596)/Official notice.

With respect to claim 13, Ovshinsky et al discloses a memory element/system having appropriate field emitter – see col. 11 lines 28-50.

The recording medium is a phase type – see the discussion starting at col. 1 line 33.

The examiner interprets the above disclosure as meeting the claimed subject matter of claim 13.

With respect to claim 14, the Gibson document further discusses the controller and function thereof.

With respect to claims 15-17, the operation/effect so recited is met by the effect of Gibson et al.

With respect to claim 18, although not clearly depicted, an appropriate "interface" device must be present/inherently in order for the data to be either recording/reproduced from the storage medium.

With respect to claim 19, the materials are discussed in Ovshinsky et al.

With respect to claim 20, this limits itself to a single emitter. See the above discussion in Ovshinsky et al, see col. 11 lines 28-40. A controller must be present in order to control the emitter.

With respect to method claims 21-23, these are met when the above combined system operates, as well as the discussion in Gibson et al starting at col. 5 lines 8-51

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aristotelis M. Psitos whose telephone number is (571) 272-7594. The examiner can normally be reached on M-F: 6:00 - 2:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne D. Bost can be reached on (571) 272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
